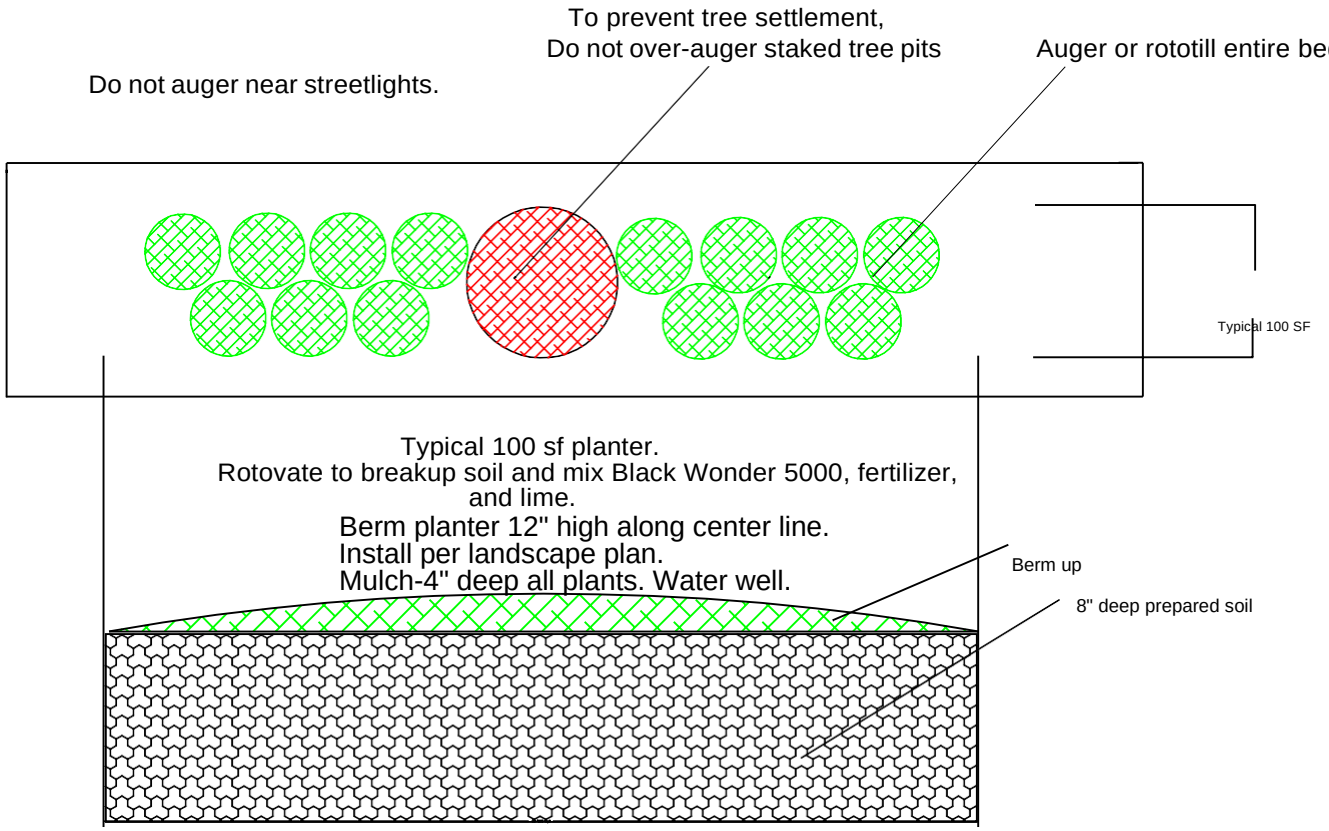
Black Wonder 5000 Soil Builder Enriched Planting Areas

Prepare each planting area with Black Wonder 5000, slow release complete fertilizer, and lime as needed before planting


1. Contact ULOCO for underground utility location. Contact General Contractor for site utility locations.
2. Remove large stones and debris. Add topsoil to bring planter to grade.
3. Spread (4) 1.5 cu ft bags Black Wonder 5000, 1# 18-18-18 fertilizer (50% of nitrogen from a 3 month slow release source), lime if needed per soil report per 100 sq ft of planting area.
4. Auger or rototill entire planter 8" deep to break up and mix soil, lime, complete fertilizer and Black Wonder 5000. to build topsoil.
5. Mound planter with topsoil-6" high along center of planter.
